The Award Winning Revolutionary Adjustable Spacer Fixing

The best products deserve the best components and our ingenious fixing can seriously strengthen your product offering with the potential to reduce costs!

Space-Plug is an award winning innovation business that has been supporting kitchen, bedroom and bathroom cabinetry manufacturers and installers for the best part of 10 years. To date Space-Plug has sold nearly 7 million of our "Adjustable Spacer Fixings" (ASF) to furniture manufacturers and installers all around the world. Our unique patented product, can save both valuable time and money, when manufacturing or installing a cabinet base unit. Affectionately known as the "kitchen fitters friend", our fixing is currently being used by thousands of kitchen cabinetry makers and installers all over the world. It usually takes just ONE simple adjustable spacer fixing to securely fix ONE base cabinet to a wall and its fast, adjustable, robust and professional... Just read our reviews!

Not only a 5 star, designed for purpose solution, it can come with genuine financial savings. Our adjustable spacer fixing can reduce the amount of materials used to manufacture kitchen base units. Reduce wastage, weight, footprint, warehousing and transport. A fantastic ally to CO2 targets as well as to your bottom line! Kitchen installers embrace the massive time savings, the reduction in modifications and handling. The units fabrication is no longer compromised as edgbanding remains intact so even the customer wins!

We believe that's a lot of key selling benefits from a pennies investment!

The "Reg"
Bridging 30-50mm gaps

The "XL"
Bridging 45-80mm gaps

Made from strong, durable polypropylene, our 'adjustable spacer fixing' comes in two convenient sizes that **bridge the gap**.

Available in Orange, Black & White

Our **fixings** are **manufactured in the UK**.

We are proud that all designs and manufacturing of our products are made in the UK.

We are not reliant on the manufacture of our products overseas. This ensures we're always able to respond to demand super quickly.

Agile & flexible to **acomodate any sized order** within a **short turnaround**.

Why do **installers** and **their customers** want to fit **your furniture** with an **adjustable spacer fixing**?

They're **fast**

Speak to any professional kitchen installer or DIY'er that uses our adjustable spacer fixing and they will tell you just how fast they are to use. With fewer parts and fewer fixing points required, in most cases just one, installers have a much shorter simpler process, with less pieces of hardware to locate, to be repeated fewer times.

They're **accurate**

Once the base unit's placement has been established the installer no longer needs to mark or move the unit again. The installer drills the cabinet just once, anywhere that suits and continues drilling straight through into the wall. With no moving and no re-aligning our adjustable spacer fixing is always 100% accurate.

They're **easy**

Our adjustable spacer fixing is a super simple process for any professional installer or DIY'er alike. As our fixing is so user friendly it saves time, hassle & frustration.

They're **flexible**

Kitchen installers are no longer pinned to the edges by fiddly 'L' brackets. Our adjustable spacer fixing is 3D! Move left or right, in or out, or even up or down (if you really wanted to). The installer can choose any convenient fixing point across the whole unit. Simple to move to easily avoid pipework, cabling or even line up with wall studs and avoid dreaded cavity wall fixings.

They're **adjustable**

Our fixing is unique and patented because it is adjustable. No matter the void size, our adjustable spacer fixing allows the installer to bridge the gap to set the precise fixing position of your units in seconds. With the telescopic adjustment packers or shims are no longer required and 100% redundant.

They're **accessible**

It is hardly surprising to learn that installers really dislike working in tight spaces, or at awkward angles, or through fiddly access ports. They do however love our adjustable spacer fixing as they can make a solid and secure fixing from any accessible area on the cross brace. They also love the simplicity to remove a unit at any time during or after the installation.

1 Drill Straight Through

2 Thread Your Screw & Locate

3 Unwind To Fit

4 Tighten Up!

They're **professional**

All kitchen installations warrant the correct fitting for the job. How much is involved in a decent wall hanging system? Our adjustable spacer fixing is the only designed for purpose fixing for base units. This is why it is a patented proprietary solution. Today's modern customers expect high end products even when their budgets might not match and with a pennies investment in Space-Plug they're not disappointed.

Kitchens installed with our fixings are both robust with a fantastic looking finish that installers are proud to show their customers... even whilst waiting for their templated worktops to go on! There's a first!

Kitchen **cabinet designers, buyers, installers...** in fact all the great people that utilise our fixings we call, "**Space-Plug Fixologists**".

They're all people that think and do the job right!

Are you a **Space-Plug Fixologist**?

A **Revolutionary** Fixing for an **evolutionary** process.

We want you to **join us** and **supply an adjustable spacer fixing** with your furniture.

The **revolution** has
started, now is the **time**
to **join us!**

Are you old enough to remember when base units were manufactured with side panels that reached all the way to the floor? Our apologies if you are! FYI younger readers... the product designers back then had no means at their disposal to consider that most floors are uneven. Kitchen installers spent hours levelling up units with shims, off cuts and even beer mats! Fortunately, times have changed and someone (we don't know who!?) invented the adjustable plinth feet we've known and loved for over 40 years now. Naturally, manufacturers soon reduced the height of their side panels so as not to impede the performance of this "wizard" new accessory, to save materials and to maintain the unit's integrity by keeping the board off the damp floors. Beer mats were once again safely confined to the pub!

It is hard to fathom that in the 21st Century base units have hardly changed in their basic design since then. Thousands of product designers over the years have overlooked the opportunity to simply turn this idea on its side and repeat the benefits! **Manufacturers still produce units with extended sides at the back of the units as product designers still believe these help installers by creating a service void in which to hide all our cables and pipes. The reality is they actually impede installation!** They leave installers reaching for the jigsaw to 'hack' away at the integrity of your cabinetry. Chopping out swathes of edgbanding in on site modifications around pipes and uneven walls wasting their time, over handling units, getting frustrated and binning important protection.

Welcome to the next evolutionary process! Our easy to use, award winning adjustable spacer fixing is the next game changer. Providing a strong, fast fixing and providing instantaneous flexibility for the installer just like the adjustable feet. **And just like the adjustable feet our adjustable spacer fixing systems can speed up installation, save on materials and preserve your units integrity...**

Why you should **supply our adjustable spacer fixing systems** with your **furniture?**

Improve your **Sales**

Adding a 5 star, award winning patented product to your furniture will impress installers and your customers alike. When looking for the best sales force you can afford, look no further than happy customers and happy installers. Achieving their seal of approval will undoubtedly improve your overall sales.

Improve your **Marketing**

Whichever of our fast fit systems you choose, we'll provide you our marketable seal of approval. These trust seals are designed specifically so your marketing team can add the sales benefits quickly and easily to all your online and offline marketing materials. Utilise Space-Plug Freedom or Space-Plug Evolution and you'll be reducing materials, waste and transport helping you with CO2 targets and giving you some great green marketing value.

Improve your **Quality**

By adding any of our Patented and Proprietary Fast Fit systems you'll be offering a quality improvement that provides instant added value. With Space Plug Freedom or Evolution at your disposal, the opportunity to leave your edgbanding on your furniture and not in the skip is a significant quality improvement too.

Improve your **Costs**

Pulling out all your 'L' bracket fitting components and adding an adjustable spacer fixing instead will cost no more than pennies. Utilise Space-Plug Freedom or Space-Plug Evolution and you'll actually save money! Some of the lowest cost added value you can achieve.

Improve your **Profits**

Whether it's with a tiny investment or even a cost saving adding an ASF with any of our 3 Patented fixing systems will lift your quality, add to your marketing, improve your sales and undoubtedly see you increasing your profits!

How to supply our adjustable spacer fixing systems to **your customers.**

Fixing done right 

This really is the quickest and simplest way to create instant extra value to your furniture. Our fixing only costs pennies, yet the benefits to your business provide you with a huge return on investment.

When you supply your customers with an adjustable spacer fixing in the box, we will give you permission to use our Space-Plug “Badge of Honour”. Our seal of approval has been specifically designed as a trust seal, for you to use in anyway you see fit.

Advertise our “Badge of Honour” in your showrooms, on your website, on your social media channels, in your marketing literature and on your packaging. Your customers will recognise that your business has invested in a patented and award winning, proprietary fast fit system for their benefit. Provide your marketing team with another means to add value to your furniture, this time for a next to nothing investment.

Be ahead of the game and demonstrate a real intent to “get it done RIGHT!”.

OPTION 1

Put our award winning adjustable spacer fixing **in your box.**

7 Reasons to supply one in the box!

- **Fast**
- **Easy**
- **Professional**
- **Accurate**
- **Adjustable**
- **Flexible**
- **Accessible**

The "Space-Plug" In the Box

We have known for a very long time the added value supplying an adjustable spacer fixing brings to your brand and your cabinetry. To celebrate the benefits our proprietary fixing systems bring to your business, we have designed the "Space-Plug" Badge of Honour, that your marketing team can use to communicate with your customers that you have invested in an award winning fixing.

The cheapest marketable benefit you'll ever buy!

The Benefits to You, Your Installers & Your Customers.

Speed up installation.
 Installation is much faster with our adjustable spacer fixing. Usually only 1 fixing per base unit with fewer components per fixing. Loads less to find and never a need to move a unit once in place.

A faster fit makes for happier installers and happier customers!

Reduce the components you supply.
 With an adjustable spacer fixing there is no need for: 2 x 'L' brackets, 2 x attachment screws, 2 x access ports and 2 x cover caps.

Remove all these and just add 1 Space-Plug adjustable spacer fixing!

Reduce handling.
 With an adjustable spacer fixing in the box there's never a need to move a unit once it's in place.

Drill straight through for 100% speed and accuracy!

Want to install your furniture with perfect accuracy?
 Of course you do and so do installers and so do your customers! By providing an adjustable spacer fixing everyone achieves the perfect install as there is no need to mark or move a unit, beautifully simple inherent adjustability, as well as the ability to fix wherever it suits!

Showcase to the world that your cabinetry excels in providing creative solutions.
 Demonstrate and celebrate that your business has the determination to have creative solutions to age-old headaches, simply by adding Space-Plug adjustable spacer fixings!

Provide a professional finish
 While your customer waits for those templated worktops, your base units look great when fitted with a row of robust, designed for purpose fixings. Unsightly, skewed & fiddly little brackets are not what your installers or your customers want to use or see!

Replace fiddly complex out of date practices!
 Installers will revel in the ease and simplicity of installing your furniture with an adjustable spacer fixing.

Want your fixings to be accessible as they should be?
 Supplying an adjustable spacer fixing in the box they are! Whether that's during the install or after, it is always the simplest of tasks to reach and access.

Innovation at every turn.
 Tell your customers and installers that your business is cutting edge and provide the very best in innovative products to get the job done right... Fast!

Be ahead of the game.
 Adding Space-Plug adjustable spacer fixings demonstrates a real intent that you are a manufacturer that likes to "get the job done RIGHT!"

x1 Adjustable Spacer Fixing

x1 Base Unit With Shortened Side Panels

Option 2

SPACE-PLUG

Freedom

Set your furniture free

Give your furniture a 'Passport to Freedom' and watch it soar!

Contrary to popular design protocols creating the service void with extended side panels is not useful to anyone. It's an unnecessarily expensive system for the manufacturer, risks the units integrity and creates far more problems than it solves for the installer.

SP Freedom, frees up your furniture from age-old installation headaches of surface mounted pipes, meandering walls, over handling and on site modifications. Just as happened after the invention of plinth feet our adjustable spacer fixing allows you to shorten the side panels and reap some big rewards. Reduced materials, increased optimisation, reduced footprint and reduced weight. All will help you save money, increase profits and gets you another step closer to achieving your carbon neutral goals.

Installers now decide exactly where they want the unit in relation to the wall behind. They never have to scribe around a pipe or wobbly wall and edgbanding ALWAYS remains intact! Because there's no scribing there's no marking or moving a unit once in the room! That combined with fewer fixing points with fewer components means this super-fast and environmentally friendly system is a hit with installers and customers alike.

The idea of replicating to the wall what we've done for so long with the floor really is an obvious and simple way to create instant savings. Our fixing only costs pennies, yet the benefits to your business provide you with a huge return on investment, great financial and material savings as well as added marketing benefits. When you adopt Space-Plug Freedom, we will give you permission to use our Space-Plug "Passport To Freedom". Our badge has been specifically designed as a trust seal, for you to use in any way that suits you. Advertise in your showrooms, on your website, on your social media channels, in your marketing literature and on your packaging. Your customers will recognise that your business has invested in a patented, award winning, proprietary fast fit system for their benefit. At the same time provide your marketing team another tool to add value to your furniture, showing you're ahead of the game and demonstrating a real intent to think! ... and do it RIGHT!

The "Space-Plug" Passport to Freedom

When you adopt the Space-Plug Freedom fast fit system, as well as saving money in your manufacturing methods, we will give you the marketing tools to reap all the marketable benefits.

To celebrate our patented & proprietary fixing systems, we have designed the "Space-Plug" Passport to Freedom trust seal. Create instant added value, by using our trust seal in marketing material and on your packaging. Tell your customers that you have invested in an award winning fixing for their kitchen.

The cheapest marketable benefit you'll ever buy!

The Benefits to You, Your Installers & Your Customers.

Speed up installation.

SP Freedom is a faster fitting process. With usually only 1 fixing per base unit, there are fewer components to find and installers never move a unit once in the room. They never have to cut round services, never have to scribe because of out of plumb walls, and never have to re-edgeband.

A Super-Fast Fit has to make for happier installers and happier customers.

Reduce the components you supply.

With SP Freedom no need for: 2 x 'L' brackets, 2 x attachment screws, 2 x access ports, 2 x cover caps, 2 x 50mm (void width of materials) x 720mm
Just add 1 Space-Plug adjustable spacer fixing

Reduce handling.

With Space-Plug Freedom there's never a need to move a unit once it's in place.
Drill straight through for 100% speed and accuracy!

Innovation at every turn.

Take to the salesroom floor and show your customers and installers that your business is cutting edge and provides the very best in innovative products to get the job done right... Fast!

Want to install your furniture with perfect accuracy?

Of course you do and so do installers and so do your customers! By providing an adjustable spacer fixing everyone achieves the perfect install as there is no need to mark or move a unit, beautifully simple inherent adjustability, as well as the ability to fix wherever it suits!

Looking to preserve your guarantees.

With Space-Plug Freedom there's no need to ever cut a unit on site ensuring your edge banding remains intact, protecting as it should and not filling up the onsite skip.

Looking to help save the planet?

With Passport to Freedom, you can store more base units in your warehouse and in your lorries as cabinets have a smaller footprint. You'll even reduce on packaging which all adds up to a pretty decent saving on that carbon footprint.

Provide a professional finish

While your customer waits for those templated worktops, your base units look great when fitted with a row of robust, designed for purpose fixings. Unsightly, skewed & fiddly little brackets are not what your installers or your customers want to use or see! And your customers would much prefer not to see great chunks of unit and edgebanding chopped out!

Replace fiddly complex out of date practices!

Installers will revel in the ease and simplicity of installing your furniture with an adjustable spacer fixing and delight in the fact they have no more cutting, shimming or offering up units to wobbly walls!

Want your fixings to be accessible as they should be?

With an adjustable spacer fixing they are! Whether that's during the install or after, it is always the simplest of tasks to reach and access.

Looking to be ahead of the game

Adding Space-Plug Freedom demonstrates a real intent to "get it done RIGHT!" whilst saving money, saving time and saving materials!

Showcase to the world that your cabinetry excels in providing creative solutions.

Adopt Space-Plug Freedom to demonstrate and celebrate that your business has the determination to have creative solutions to age-old headaches, and achieve your goal of carbon neutral.

Aiming for NET Zero! Or just have a requirement to save materials costs

With Space-Plug Freedom you'll save board by cutting smaller parts but will also find smaller parts will optimise even better, saving you more and reducing waste even further!

x1 Adjustable Spacer Fixing

x1 Base Units With No Sides

x2 Datum Pegs

Datum meaning
A fixed starting point of a scale or operation. "an accurate datum is formed by which other machining operations can be carried out"

Option 3

SPACE  PLUG
EVOLUTION
Evolve and sustain 

'I want to supply an adjustable spacer fixing with my units and want the savings and benefits of Space-Plug Freedom but worried my installers won't understand the flat-back units?'

We've got you covered! Space-Plug Evolution

All the benefits of 'In the box' & 'SP Freedom', but with the benefit of knowing your customers still have that all important starting point! Introducing the SP Datum Peg. A cuffed peg that slides easily into pre-drilled holes in the rear of the cabinet. Even the most experienced kitchen installer may find a base unit with no protruding side panels a conundrum. So to avoid head scratching, as its name suggests, our ingenious invention creates the perfect starting point for installers when first offering their cabinet to the wall. Datum Pegs come in 5mm increments from 35mm to 65mm... so everyone's covered!

Save material, save money and add value marketing with Space-Plug Evolution. When adopting the evolutionary process, we will give you permission to use our Space-Plug "Certificate of Evolution". Our seal of approval has been specifically designed as a trust seal, for you to use in any way you see fit. Advertise in your showrooms, on your website, on your social media channels, in your marketing literature and on your packaging. Your customers will recognise that your business has invested in a patented and award winning, proprietary fast fit system for their benefit and at the same time provide your marketing team another tool to add value to your furniture. Be ahead of the game and demonstrate a real intent to "get it done RIGHT!" whilst saving money, preserving guarantees, saving time and saving materials!

Finally, the kitchen base unit has evolved!

PAGE 24
OPTION 3

10 Reasons to Evolve and Sustain that, “Old School” feel!

- Save **MONEY**
- Save **MATERIALS**
- Save **WASTE**
- Save **FOOTPRINT**
- Save **WEIGHT**
- Save **TRANSPORT**

All with virtually no change to installation habits!

The “Space-Plug” Certificate of Evolution

When you adopt the Space-Plug Evolution fast fit system, as well as saving money in your manufacturing methods, but retaining the traditional way of installation, we will give you the marketing tools to reap all the marketable benefits. To celebrate our patented & proprietary fixing systems, we have designed the “Space-Plug” Certificate of Evolution trust seal. Create instant added value to your cabinetry, by using our trust seal in marketing material and on your packaging. Tell your customers that you have invested in an award winning fixing for their kitchen.

The cheapest marketable benefit you’ll ever buy!

WE PROUDLY SUPPLY

The Benefits to You, Your Installers & Your Customers.

Speed up installation.

SP Evolution is a faster fitting process. Usually only 1 fixing per base unit, there are fewer components to find and installers never move a unit when set in the room. They never have to cut round services, never have to scribe because of out of plumb walls, and never have to re-edgeband. Evolution instantly creates your service void measurement and the perfect starting point!
An Ultra-Fast Fit is always going to please installers and customers alike.

Reduce the components you supply.

With SP Evolution no need for: 2 x ‘L’ brackets, 2 x attachment screws, 2 x access ports, 2 x cover caps, 2 x 50mm (void width of materials) x 720mm
Just add 1 Space-Plug Adjustable Spacer Fixing, a couple of Datum Pegs and their locator holes.

Reduce handling.

With Space-Plug Evolution there’s never a need to move a unit once it’s in place.
Drill straight through for 100% speed and accuracy!

Innovation at every turn.

Take to the salesroom floor and show your customers and installers that your business is cutting edge and provides the very best in innovative products to get the job done right... Fast!

Want to install your furniture with perfect accuracy?

Of course you do and so do installers and so do your customers! By providing an adjustable spacer fixing everyone achieves the perfect install as there is no need to mark or move a unit, beautifully simple inherent adjustability, as well as the ability to fix wherever it suits!

Looking to preserve your guarantees.

With Space-Plug Evolution there’s no need to ever cut a unit on site ensuring your edgebanding remains intact, protecting as it should, and not filling up the onsite skip.

Looking to help save the planet?

With Evolution, you can store more base units in your warehouse and get more units on your lorries! Cabinets have a smaller footprint and weigh less. You’ll even reduce on packaging which all adds up to a pretty decent saving on that carbon footprint.

Provide a professional finish

While your customer waits for those templated worktops, your base units look great when fitted with a row of robust, designed for purpose fixings. Unsightly, skewed & fiddly little brackets are not what your installers or your customers want to use or see! Your customers would much prefer not to see “great chunks” of unit and edgebanding chopped out!

Replace fiddly complex out of date practices!

Installers will revel in the ease and simplicity of installing your furniture with an adjustable spacer fixing and delight in the fact they have no more cutting, shimming or offering up units to wobbly walls! And with Datum Pegs in the box that initial offer up will be just like the old days... but BETTER!

Aiming for NET Zero! Or just have a requirement to save materials costs

With Space-Plug Evolution you’ll save board by cutting smaller parts but will also find smaller parts will optimise even better, saving you more and reducing waste even further!

Whichever is your preference **join the revolution** and **supply your customers** with any 1 of our 3 **patented, proprietary and award winning fast fix systems!**

Our Story

Space-Plug Ltd was founded to create products that support kitchen, bedroom and bathroom cabinetry manufacturers and installers.

We **innovate** and **develop products** that **save time** and help **reduce wastage in our industry**.

Our founder, Cliff Petit, invented our top selling product after spending 10 years on the tools installing kitchens, he believed there was a better way to fix base cabinets to walls and put an end to irritating 'L' brackets. He started his inventing journey and Space-Plug adjustable spacer fixing was brought to market in 2013. Over the last 9 years, **Space-Plugs products have been highly regarded as a game changer, just read a few of our retail reviews!**

We proudly **won an innovation award** from FIRA our key industry body. Even prouder that our small but mighty Adjustable Spacer Fixing has made installing base units fast, simple and more professional than ever before. To date, Space-Plug Ltd has sold over 7 million Space-Plug Adjustable Spacer Fixings, to manufacturers that sell them as part of their units, to kitchen and cabinetry installers and home DIY'ers that find an ever growing range of uses for our well-loved invention.

Our future looks bright (or **orange!**) as Cliff and his expanding team are passionate about our environment and the impact we are making on the world.

We continue to **re-invest profits made**, back into in the business to invent new products that will help manufacturers of cabinetry to significantly reduce materials used in the production of cabinets.

We are always happy to speak to anyone that is interested in our vision and serving our industry helps us to achieve fit for purpose products.

From the whole team at Space-Plug, we look forward to hearing from you!

Great for manufacturers, great for the customer and great for the environment.

"Congratulations to Cliff for identifying a problem and inventing this new style of fixing to address it. Our experts were impressed with Space-Plug for its ease-of-use and as an alternative to fixing brackets at an angle. We are pleased to present the Innovation Award to Space-Plug and look forward to seeing its success within the industry."
